ABOUT

Staff Backend Engineer with 11+ years of experience specializing in Ruby/Rails and cloud technologies (AWS, GCP). Proven track record designing and implementing scalable solutions across fintech (cards, payments), e-mobility, and event platforms. Technically proficient with a passion for DevOps, AI, and self-hosting applications. Strong advocate for team collaboration and fostering professional relationships, with a keen interest in psychology, coaching, and self-development. Passionate about work that has a genuine positive impact on people. Seeking roles that leverage my Ruby expertise while offering opportunities to learn and work with Golang, TypeScript, and Python.
